SHORT COURSE

# Monitoring and Evaluation Course for the Public Sector

## Brief Description

The intensive and comprehensive short course in Monitoring and Evaluating for the Public Sector equips its participants with the skills necessary for efficient public service delivery.

Participants should be able to:

- Track the status of projects in the public sector;
- Recognise M&E as a tool for monitoring, evaluating, and controlling the implementation of strategic plans;
- Recognise the roles and obligations of government employees as agents of M&E;
- Obtain knowledge in emerging concepts like data analytics and management in M&E.
- Gain from the most recent M&E theories and methods including outcomes and participatory approaches'
- Set up and implement results-based monitoring and evaluation systems.

Participants will gain expertise in using monitoring and evaluation in initiatives to strengthen the public sector.
